

ABSTRACT

A substrate suitable for printing a toner image thereon, comprising:
a sheet of plastic;

an underlayer coating, on the sheet of plastic, comprising a first polymer material
5 preferably comprising a polymer chosen from the group consisting of amine terminated
polyamide, a silane coupling agent and amino propyl triethoxy silane; and

an overlayer coating, directly on the underlayer, comprising a second polymer material
and having an outer surface to which a toner image can be fused and fixed, the second polymer
preferably consisting essentially of a polymer chosen from the group consisting of ethylene
10 acrylic acid copolymer, polyvinyl pyridine and styrene butadiene copolymer.
